

## **Mission Statement**

### **Company Profile**

Since 1956, we have been experts in erosion and corrosion protection in the form of coating technologies for the repair of condensers, heat exchangers and cooling water systems.

### **We stand for sustainability and innovation**

Our coating technologies apply sustainable materials, which means they are solvent free, non-VOC and 100% solid epoxy materials. We strive to constantly improve the high quality of our products and the services we offer by means of innovative technology and developments.

By working together with local employees and application teams who are constantly being given up-to-date training so that they are continuously up to speed with the very latest in technology, we guarantee the most economic and ecological processing procedure available.

We also want to continue being the market leaders in our field. For that reason, we constantly strive to carry out research, to obtain and manage patents, licences and brands.

### **We bear our responsibility in Compliance**

We place legal compliance at the very foundation of every kind of business activity that we undertake, including adherence to own strict regulations.

The requirements are also an obligation for successful business relations with our partners.

The compliance management programme is targeted at both minimising risks and at complete transparency concerning any irregularities which may arise. For only in this way is compliance effectively achieved.

### **We take our responsibilities toward our clients very seriously**

Our business policies are constantly subject to critical review and further developed.

We place great emphasis upon our partners following the same values, goals and principles that we have.

All of our employees make an important contribution to the overall result achieved by our company through their work. In this way, our clients' projects are assured of success.
